DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald Snider (Registration No. 24,962) on July 22, 2005. The application has been amended as follows:

In the claims:

Claim 2, line 15, after "shades" insert --on the image sensor--

Claim 2, line 17, replace "sensor." with --sensor based on the unblocked illumination of the laser beam.--

Claim 3, line 15, replace "portion." with --portion; (e) wherein the presence of colonies of microorganisms are detected by analyzing the projected image data obtained by said image sensor after colonies grow large enough to create shades on the image sensor and the colonies block the laser beam to produce projected image data of the colonies on the image sensor based on the unblocked illumination of the laser beam.--

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the essential difference from the prior art is detecting the presence of colonies of microorganisms by analyzing projected image data obtained by an image sensor, wherein the projected image data is based on unblocked illuminations from a laser beam. The colonies are grown large enough to block the laser beam and create shades on the image sensor. These features in combination with the other elements of the claim and the base claim are not disclosed or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Relevant Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Sweet U.S. Patent No. 3,736,432 discloses a method for detecting the presence of colonies of microorganisms based on projected image data.
